

NATIONAL FEEDER & STOCKER CATTLE SUMMARY - WEEK ENDING 10/17/2008

RECEIPTS:	Auctions	Direct	Video/Internet	Total
This Week	213,600	32,000	40,800	286,400
Last Week	222,500	25,600	1,300	249,400
Last Year	335,000	44,700	16,000	395,700

Compared to last week's sharply lower market, feeder and stocker cattle prices were very uneven. Most areas reported improved demand at the lower price levels, but still only moderate at best. Price trends ranged from 5.00 lower to 5.00 higher, with stocker calves receiving most of the advance and heavier feeder cattle withstanding the bulk of the losses. The CME fall feeder cattle futures have lost over 7.00 and the cash fed cattle market has dropped 9.00 in the last three weeks on insurmountable pressure from the financial sector. This has taken its toll on feeder cattle prices but, at the same time spot corn futures are 1.40/bu lower in the midst of a full swing harvest that continues to come in larger than first predicted (although high in moisture). The slight spark in calf demand is coming from the hard red winter wheat grazing country where conditions have been almost ideal.

The struggling global economy has been weighing heavy on the US beef cattle market, but when prices return to fundamental supply and demand for direction there is plenty of data to back-up a bullish rally. The year to date beef cow slaughter is 13.6 percent bigger than last year and 23.8 percent more than the five year average as we continue to cull our herds. August US beef exports were 71 percent larger than the same period in 2007, while shipments to Japan are up 60 percent so far this year. Friday's cattle-on-feed report initially appeared supportive to the feeder cattle market with October 1st totals at 95 percent of last year, September placements at 94 percent of 2007, and marketings 107 percent of the same period a year ago. All of these figures came in slightly on the bullish side of expectations with placements being the most significant and marking 6 out of the last 7 months in which the number of cattle put on feed was smaller than year ago levels. Feeder cattle marketings continue to run very light this fall as this week's reported nationwide auction volume was more 36 percent lighter than last year. It's difficult to tell what portion of this is due to tighter numbers and how much is due to producers refusing to sell on this down market. Many producers are tempted to send their cattle to the feedlot and retain ownership, although a large number of these cattle raisers swore that their cattle feeding days were over. Luckily, the mild summer and adequate moisture in most areas has allowed producers to hold cattle as many will wean their calves in hopes of adding value. The coming weeks will be a true price discovery for feeder cattle as price levels will dictate who in the industry is willing to invest in the future, much like the situation on Wall Street. This week's reported auction volume included 36 percent over 600 lbs and 39 percent heifers.

Auction Receipts: 213,600 Last Week: 222,500 Last Year: 335,000
